

**Session 3.9 – Replantation (micro and macro)**

**Objectives:**

1. Appreciate the indications and relative contraindications to replantation
2. Describe the safe method of storage and transport for the amputated segment
3. Describe the surgical sequence for replantation of a digit (whilst acknowledging that this may vary between surgeon and case)
4. Be aware of the typical expected outcomes following a successful replant (which are key to the consent and decision making process)
5. Appreciate the differences between digital vs large segment replantation

**Primary Resources:**

1. BFIRST/BSSH Global Webinar Series: Replantation (1:25:14):
